OPEN ACCESS MOVEMENT AND IRs

The Open Access movement began in the 90's as a result of the development of the World Wide Web. The movement aims to make academic publications immediately available free of charge and free of most copyright and licensing restrictions.

The movement really took off in the early 2000s, led by some key events:

2002

The Budapest Open Access Initiative

2003

The Bethesda Statement

2003

The Berlin Declaration

Today, the Open Access Movement is a global phenomenon

The need for Open Access and Institutional repositories is recognised by some key national and international bodies:

UNESCO strongly supports unrestricted Open Access (UNESCO, 2022)

SPARC Europe promotes the use of IRs at third level and mandates researchers to deposit.

EU Commission

Recommendation 2018/790

The Commission encourages Member States to set and implement clear national policies for the dissemination of and open access to scientific publications and the management of research data, resulting from publicly funded research.

National Framework on the Transition to an Open Research Environment 2019 (Ireland)

“The importance of open archives and repositories for hosting research outputs is acknowledged due to their sustained role in enabling open access over many years, their archiving and long-term preservation function, and their potential for editorial innovation” (pg. 7)

WHAT IS AN INSTITUTIONAL REPOSITORY?

An **Institutional Repository** is an online locus for collecting, preserving, and disseminating, in digital form, the intellectual output of an institution, particularly a research institution.

Some key objectives of an institutional repository are:

- To share an institution's scholarly research globally.
- To provide open access to institutional research.
- To create a single location for content storage.
- To store and preserve other institutional digital assets, including unpublished literature.

MATERIALS THAT CAN BE HOSTED ON A REPOSITORY

Academic materials

- Article preprints
- Peer-reviewed post-prints or published articles
- Book chapters
- Conference proceedings

But also

- Theses and dissertations
- Academic posters
- Reports
- Video recordings of webinars, research presentations, and events
- Photographs
- Conference presentations

HECA REPOSITORIES AT A GLANCE

Launched in 2010
DSpace powered by Atmire

Launched in 2014
Eprints

Launched in 2019
Digital Commons powered by BePress

Launched in 2021
DSpace powered by Atmire

IR's CREATION

Considerations

➤ Open Access VS Commercial Software

➤ Build in-house VS SaaS e.g. Atmire and Dspace Direct (from DuraSpace)

Staffing

Time

Buy-in

CHALLENGES

Challenges that come from technical skills required of the repository managers

- Digital preservation
- Technical skills involved in the operation of databases
- Knowledge of standards for metadata

Challenges that come from the perceptions and knowledge of users

- Awareness among staff/users of the institutional repository
- Understanding how research output is viewed by different stakeholders
- Uncertainty about author rights and publisher policies

COPYRIGHT AND CREATIVE COMMONS

Content hosted on a repository may be published under a Creative Commons license.

Creative Commons is an international non-profit organization that provides free licenses and tools that copyright owners can use to allow others to share, access and reuse their works.

Different types of Creative Commons licenses are available.

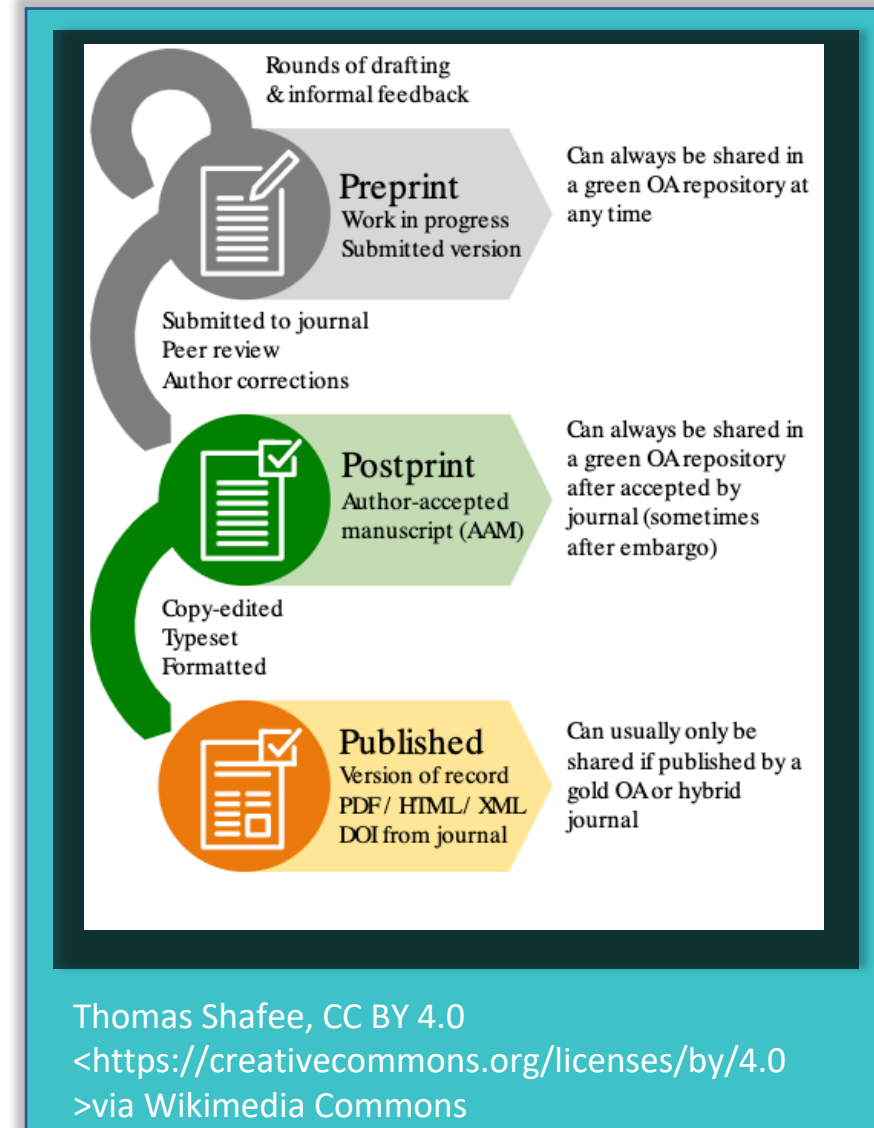

Institutional repositories may archive material such as dissertations and theses. These typically have not been published elsewhere and are archived on the repository under a Creative Commons license.

AUTHOR'S RIGHTS AND INSTITUTIONAL REPOSITORIES

The growth of the open access movement and the rise in funder open access mandates have resulted in a growing number of publishers allowing authors some form of self-archiving of their publication.

Author rights - creators of research output often retain the author's rights to have a copy of their work archived in a repository.

UNCERTAINTY ABOUT AUTHOR'S RIGHTS

Confusion about copyright is regularly cited as a reason why researchers do not initiate deposits in IRs (Kohn & Lange, 2018) .

What can repository managers do?

- create targeted messaging
- link to other resources such as SHERPA/ROMEO
- make your own license agreement discoverable and develop a guide explaining what the agreement means in plain language.
- Frame the benefits of the service in a way that responds to researchers' priorities

BENEFITS OF IRS

Increase Access/Reach: Openly accessible online – ease of access.

Wider dissemination of work / Making work freely available online reduces access barriers (i.e. not limited to journal subscribers)

Increased Impact: Increased potential for publications/research to be cited/ maximising its impact.

Reliability: IR's provide long-term storage and access to work for both staff and graduates, making it consistently accessible and discoverable.

BENEFITS OF IRS (CONTINUED)

Discoverability: Work becomes more accessible online and discoverable through search engines such as Google and Google Scholar.

Repositories enable metadata harvesting of their content - amplifying visibility and discoverability. (Indexed to Google Scholar. All IR are/will be indexed on [BASE](#), [OpenAIRE](#), and [CORE](#))

Consistency: All items are automatically assigned URLs. A permanent URL/doi makes referencing the online version of your paper more convenient and more robust.

Preservation of material: Permanent URL/doi that will not change

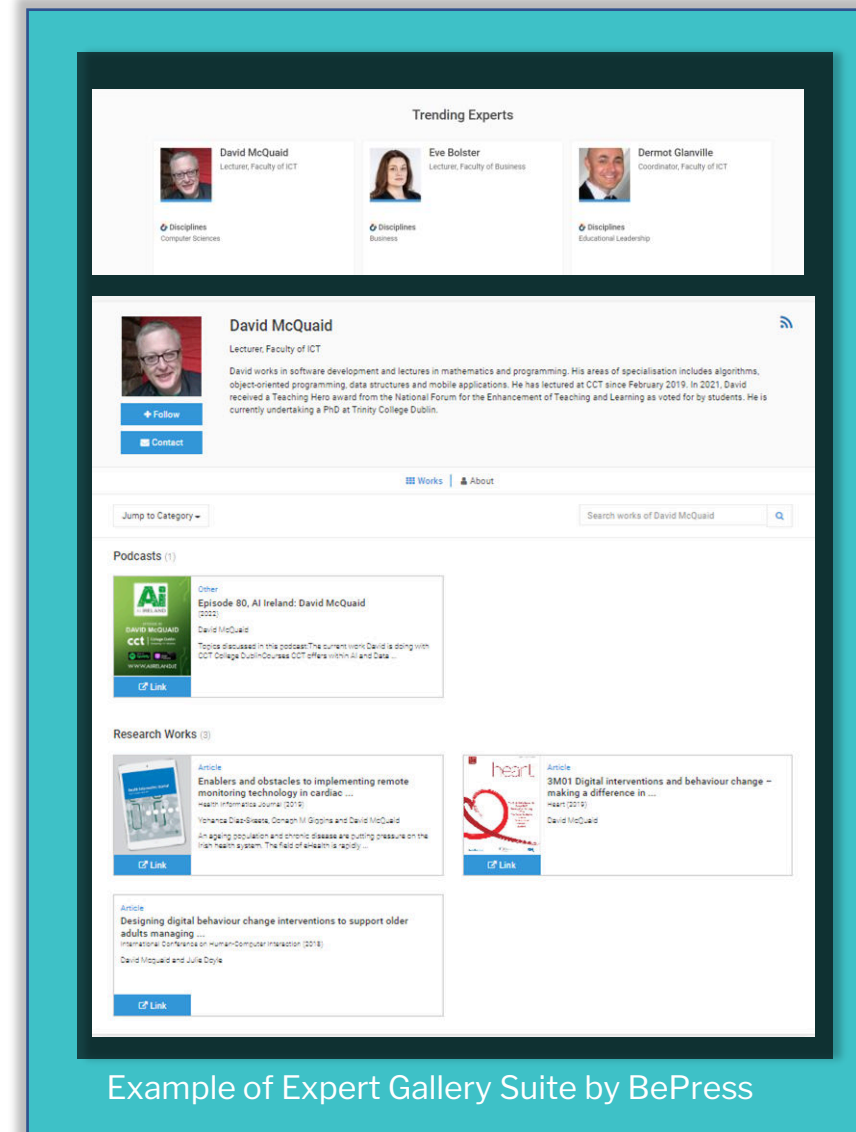

ROLE OF INSTITUTIONAL REPOSITORIES WITHIN THE INSTITUTIONAL LANDSCAPE

Increasing the visibility and prestige of an Institution

IRs increase the intellectual leadership and credibility of an institution by sharing its research output with members of the public, researchers, and prospective and current learners.

Platforms such as DSpace, Digital Commons (BePress) and Eprints offer tools specifically designed to showcase people's expertise and enhance the reputation of an institution as a whole.

Since the reputation of an institution has a direct impact on recruiting, IRs actively help an institution achieve its business goals.

Example of Expert Gallery Suite by BePress

ROLE OF INSTITUTIONAL REPOSITORIES WITHIN THE INSTITUTIONAL LANDSCAPE (Continued)

Providing a free cloud-hosted platform for journal publishing

The increasing costs of database subscriptions forced institutions to cancel some of their subscriptions.

- Open-access makes research accessible to the public.
- By publishing open-access journals, institutions can contribute to the free distribution of knowledge worldwide, while still maintaining the copyright and ownership of the research.

EBSCO

Five Year Journal Price Increase History (2018 – 2022)

This report shows price fluctuations over the last five years for typical library lists invoiced in U.S. dollars. Data for each library type is based on a merged list of titles ordered by representative libraries purchasing in U.S. dollars.

Library Type	2018	2019		2020		2021		2022		% Increase 18-22
	Avg. Title Price	Avg. Title Price	% Increase	Avg. Title Price	% Increase	Avg. Title Price	% Increase	Avg. Title Price	% Increase	
ARL	\$1,471.87	\$1,557.45	5.81%	\$1,636.24	5.06%	\$1,680.73	2.72%	\$1,737.19	3.36%	18.03%
College & University	\$1,592.63	\$1,686.24	5.88%	\$1,770.06	4.97%	\$1,816.59	2.63%	\$1,879.78	3.48%	18.03%
Academic Medical	\$1,672.54	\$1,774.87	6.12%	\$1,867.22	5.20%	\$1,920.49	2.85%	\$1,994.22	3.84%	19.23%
Corporate	\$1,706.75	\$1,809.52	6.02%	\$1,899.05	4.95%	\$1,961.49	3.29%	\$2,046.13	4.32%	19.88%
Public Library	\$90.08	\$93.95	4.30%	\$98.48	4.82%	\$99.88	1.42%	\$103.49	3.61%	14.89%
Law School	\$1,717.16	\$1,821.29	6.06%	\$1,912.10	4.99%	\$1,960.85	2.55%	\$2,034.94	3.78%	18.51%

DEVELOPING INSTITUTIONAL REPOSITORIES THAT SUPPORT TEACHING AND LEARNING

Institutional repositories as a tool to remove barriers

THE BENEFITS

- Course information from different institutions can be analysed and used to improve programme design based on industry standards.
- The ability to compare modules across institutes can help institutions identify and fill gaps by designing new modules/programmes.
- Making programme and assessment information available to everyone would attract national and international students.
- The programme accreditation process would be made more efficient and transparent if accreditation bodies could rely on a single, accessible resource to get information on a programme.

THE CHALLENGES

Challenges for faculty

- There is no incentive for the lecturers in making teaching materials public.
- Time-consuming process. Faculty would have to upload and maintain their content.
- Materials may require frequent updates.
- Learning materials are already made accessible to students through a virtual learning environment.

Challenges for librarians

- The metadata structure of the repository is not always suitable for purpose.
- Ownership of learning materials may be contentious.
- It is necessary to separate outdated materials from those currently in use.

CONCLUSION

By collecting digital materials such as faculty research, student work, policies and documentation, and learning materials, institutional repositories have the potential of becoming the greatest intellectual capital of an institution.

However, repositories were designed with the perspective that a curator would be responsible for uploading the metadata which is not a sustainable model for institutions that wish to expand the scope and function of their repository.

For repositories to expand to their full potential, institutions and service providers must collaborate to develop a more user-centred design that will enable individual contributors to create and maintain records and facilitate the discovery and retrieval of materials by users.

The background features a large, stylized 'V' shape formed by two overlapping triangles. The left triangle is teal with a grey border, and the right triangle is also teal with a grey border. The 'V' shape is centered and points downwards. The text 'THANK YOU' is centered within the white space of the 'V'.

THANK YOU
